PROFESSIONAL SUMMARY

From Mobile Engineer to Technical Manager, with over a decade of experience delivering scalable mobile platforms. Led architecture initiatives and managed teams of 15+ engineers while maintaining rigorous engineering standards.

PROFESSIONAL EXPERIENCE

Software Engineering Manager

Mar 2024 – Present

7-Eleven · Dallas, TX

- Lead three specialized core teams totaling 15+ engineers who build and release the 7-Eleven, Speedway, and 7Now mobile applications, while partnering with 8+ product pods to deliver features and services across the platform.
- Orchestrated the consolidation of 7-Eleven and Speedway codebases into a unified platform, reducing development costs by 50% and without impacting delivery timelines.
- Driving release management for 7-Eleven and Speedway mobile apps, ensuring stability improvements and compliance with the latest SDK standards across both platforms.
- Led technical modernization efforts including the migration to Compose for Android and SwiftUI for iOS, while directing comprehensive library audits and upgrades to support the latest OS versions.
- Led code quality initiatives by driving SonarQube integration and establishing quality standards for shared frameworks and reusable UI components used across all three applications.
- Partnered with Security teams to enhance the organization's security posture by implementing security best practices and measures throughout the mobile application ecosystem.
- Launched automation initiatives for mobile frameworks to streamline development processes and reduce manual testing efforts.
- Work cross functionally to identify industry best practices and reusable solutions, leading their integration into various 7-Eleven mobile apps.

Engineering Leadership

Mobile Strategy

Platform Architecture

Senior Software Engineer

Mar 2021 – Mar 2024

Wayfair · Boston, MA

- Led the warehousing Android platform, enabling feature teams to scale workflows and ship faster across fulfillment operations.
- Introduced app-wide state serialization so associates resume work from cached context, boosting throughput and reliability.
- Modernized core workflows from MVP to MVI architecture, reducing defects and easing future feature work.
- Onboarded and mentored new Android engineers, accelerating team productivity and platform adoption.
- Leveraged Kotlin, Coroutines, Dagger/Hilt, SQLDelight, and Jetpack Compose to deliver resilient, maintainable mobile solutions.
- Partnered on the Nexus warehouse management system rollout supporting 18 fulfillment centers, 8,000+ users, and 124M scans in H1 2022.

Kotlin

Platform Enablement

Software Engineer

Jun 2019 – Mar 2021

Wayfair • Boston, MA

- Co-created Wayfair's Nexus warehouse management platform, replacing legacy RF hardware with touchscreen Android devices.
- Implemented reusable modules that powered 45+ warehouse workflows and millions of weekly scans.
- Partnered with operations to pilot and iterate on mobile workflows across 18 fulfillment centers.
- Established the platform as a separately deployable component, improving release cadence and scalability.

Warehouse Tech

Android

Scale

Senior Android Engineer

Sep 2018 – Jun 2019

7-Eleven • Dallas, TX

- Extended the consumer mobile platform that powers checkout, fuel rewards, and delivery journeys for 7-Eleven and Speedway brands.
- Partnered with seven product pods to deliver reusable modules and accelerate release cadence across the portfolio.

Android

Retail

Platform Strategy

Senior Android Engineer

Jul 2018 – Sep 2018

Delta Air Lines • Atlanta, GA

- Shipped rapid Android enhancements for the Fly Delta experience to support day-of-travel servicing and loyalty features.
- Collaborated with design and QA in an agile release train to deliver high-quality updates under accelerated timelines.

Android

Aviation

Contract Delivery

Technical Lead

Dec 2014 – Jun 2018

Fusion Global Technologies and Solutions • Chennai, India

- Led an eight-person mobile practice delivering asset-tracking and logistics platforms across global retail and supply-chain clients.
- Directed TrackX TrueMobile, IVT forklift tracking, and Container Centralen mobility programs from concept to deployment, cutting fleet idle time and inventory shrinkage.
- Standardized engineering playbooks, CI pipelines, and device integration (RFID, barcode, UWB) to reduce delivery variance by double digits.

Mobile Development

Technical Leadership

RFID & IoT

Software Engineer

May 2012 – Dec 2014

Naso Technologies Pvt Ltd • Chennai, India

- Delivered HIPAA-aligned mPathy mental-health assessments with WebRTC consults, offline interview capture, and automated sync safeguards.
- Built the mFirst mobility framework to accelerate Android deployments with cloud content controls, push orchestration, and modular UX delivery.
- Prototyped Google Glass surgical capture for Lifeline Hospital, enabling live OR streaming and clinician collaboration on wearable hardware.
